ADULT COURSES WELDING

Introduction

SETA are well respected by local industry as a provider of welding training. We can cater to the needs of everyone, from a novice to an experienced journeyman.

All our staff are experienced welders with training qualifications and are approved by Zurich to carry out surveying on their behalf. To add value, all of our training programmes can be linked to units of accreditation for NVQs and City & Guilds qualifications.

Welder qualifications

Qualification testing of welders and/or welding procedures to international standards can be carried out at our training workshops or at your location. All test plates will be forwarded to Zurich Engineering Ltd for testing and certification.

Welding courses

All welding course details are designed to enable trainees to meet the requirements of the desired standards. All training can be tailored to meet your company and individual needs.

Our range includes:

- Manual metal arc welding;
- Metal active gas shielded welding;
- Metal inert gas shielded;
- Tungsten inert gas shielded;
- Oxy-acetylene welding;
- Brazing and silver soldering;
- Oxy-fuel gas cutting, gouging and heating.

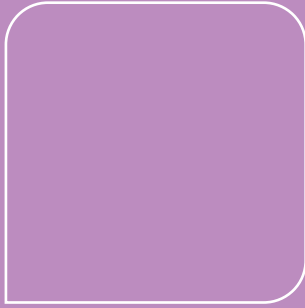

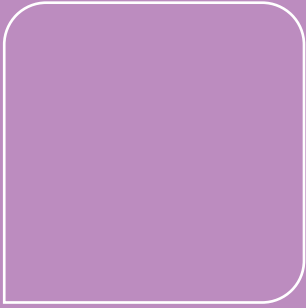

Example course outline

All training is tailored to meet your company and individual needs and will include:

- Safety as applicable to the relevant process;
- Principles of the process;
- Relevant process terminology;
- Consumables selection and storage;
- Joint design and application;
- Fault diagnosis and rectification;
- Destructive and non destructive test methods;
- Training will be undertaken on a range of material profile thicknesses to suit.
